Deputy Director of Training (General) MEMORANDUM FOR:

Chief, Junior Officer Training Division FROM

Weekly Progress Report -- 24-30 July 1953 SUBJECT

1. A comprehensive and integrated training program for Junior Officers has been suggested by the Liaison Division, OCD. assumed that this program will cover about eight months work, the latter half of which involves production of materials useful to the office. It is anticipated that for the right person this tailored program will provide wide experience in intelligence methods and in the organization of the Agency, together with some administrative experience.

2. Attempts to solve the problem of providing Junior Officer Trainees on board with provisional clearance by giving them unclassified work of value to the Agency are being made with some success. is working at the Library of Congress on his is doing research on France; candispecialty, Russia; candidate is making a study of promotion policies in industry for junior executive trainees. These three are interested in their assignments. The others are reading but are available for any unclassified assignment that might be made. Division chiefs of CTR (G) have been notified of their availability.

3. Arrangements have been made with Personnel Procurement to maintain a file of Junior Officer Trainees who have declined appointments in order to return to university work or who for other reasons may be available for employment at a later date. Contacts will be made with these individuals after the first of the year to determine their interest in Agency employment for the J.O.T. Program. would be in time to bring them on board immediately at the conclusion of the academic year.

The facts that they will be increasing their value to the Agency through this additional study; that there is continuing need for filling the requisition for the J.O.T. Program, as opposed to the limited requisition of other offices; that the declinations do not suggest disinterest in the Agency, warrant establishing this procedure. It is anticipated that by keeping these names our recruitment efforts next year will be more productive than in the past.
